

A Donate Life Organization

To Whom It May Concern:

Arizona HOSA chapters across the state plan to save and heal lives this October through participation in the High School Heroes Challenge. This challenge, created by Donor Network of Arizona (DNA), encourages high school students to compete with their peers to register the most organ, cornea and tissue donors. It is an opportunity for Arizona HOSA students to learn about the importance of donation and educate others in their schools and communities.

DNA is the state's federally designated, nonprofit organ procurement organization that coordinates organ, cornea and tissue donation for transplantation. We are dedicated to working with our health care and community partners to support donor families, facilitate organ, cornea and tissue donation for transplant and encourage people in our community to donate life.

Last year, HOSA students registered more than 3,700 organ, cornea and tissue donors through the Donate Life Arizona High School Heroes Challenge. This year, we hope to continue this successful campaign with your school's support. I invite you to visit www.HighSchoolHeroes.org to learn more and encourage you to support your HOSA chapter's participation in this challenge to save lives.

Sincerely,

Tim Brown

President and CEO, Donor Network of Arizona
